NOMAN ARSHAD

Data Engineer

Lahore, Pakistan | arshadnoman659@gmail.com | +92-306-2909173 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science graduate with strong hands-on experience in Python, SQL, and data engineering fundamentals. Skilled in building and automating ETL/ELT pipelines, cleaning and transforming data, and working with cloud-based platforms including AWS and Azure. Familiar with Databricks, Apache Spark, Apache Airflow, and Medallion architecture. Passionate about building scalable, reliable data pipelines and delivering high-quality data solutions in fast-paced environments.

EDUCATION

Bachelor of Science in Computer Science – National Textile University, Faisalabad 2022 – 2026

CGPA: 3.3 / 4.0 | Coursework: Data Structures, OOP, Database Systems, Statistics, Machine Learning, Mathematics

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, PySpark), SQL, OOP, File Handling, Data Structures

Data Engineering: ETL/ELT Pipelines, Workflow Orchestration (Apache Airflow), Data Cleaning, Data Validation, Data Integration, Medallion Architecture

Cloud & Big Data: Databricks, Apache Spark, AWS (EC2, S3)

Version Control: Git, GitHub

BI & Visualisation: Power BI, Tableau, Microsoft Excel

INTERNSHIP EXPERIENCE

Python Developer Intern – Global Stream Solution | Onsite Apr 2026 – Jun 2026

- Developed and deployed REST APIs using Python, including an Image Background Remover API using computer vision libraries.
- Collaborated with cross-functional teams to gather requirements, test, and deliver scalable backend solutions.

PROJECTS

Automated Weather Data ETL Pipeline with Apache Airflow on AWS

Python, Apache Airflow, AWS EC2, Amazon S3, OpenWeatherMap API

- Built an ETL pipeline that extracts current weather data from the OpenWeatherMap API, transforms it using Python, and loads it into an Amazon S3 bucket.
- Automated and scheduled the workflow with Apache Airflow, using DAGs, operators, and sensors, with Airflow installed and run on an AWS EC2 instance.

End-to-End Data Engineering Pipeline

Python, SQL, Databricks, Apache Spark, Amazon S3, Medallion Architecture, Databricks Genie

- Built a real-world ETL pipeline in the FMCG domain simulating a retail company acquisition scenario using Databricks Free Edition.
- Implemented Medallion Architecture (Bronze, Silver, Gold layers) to ingest, clean, and transform raw data into a consolidated Lakehouse.
- Used Apache Spark and Amazon S3 for distributed data processing and cloud storage, with Databricks Genie for reporting and insights.

CERTIFICATIONS

- SQL for Data Analytics – Packt (Coursera)
- Databricks Fundamentals – Databricks Academy

LANGUAGES

- English – Professional Proficiency
- Urdu – Native Proficiency

SOFT SKILLS

- Problem Solving
- Attention to Detail
- Team Collaboration
- Fast Learner
